

Workplace Chairs

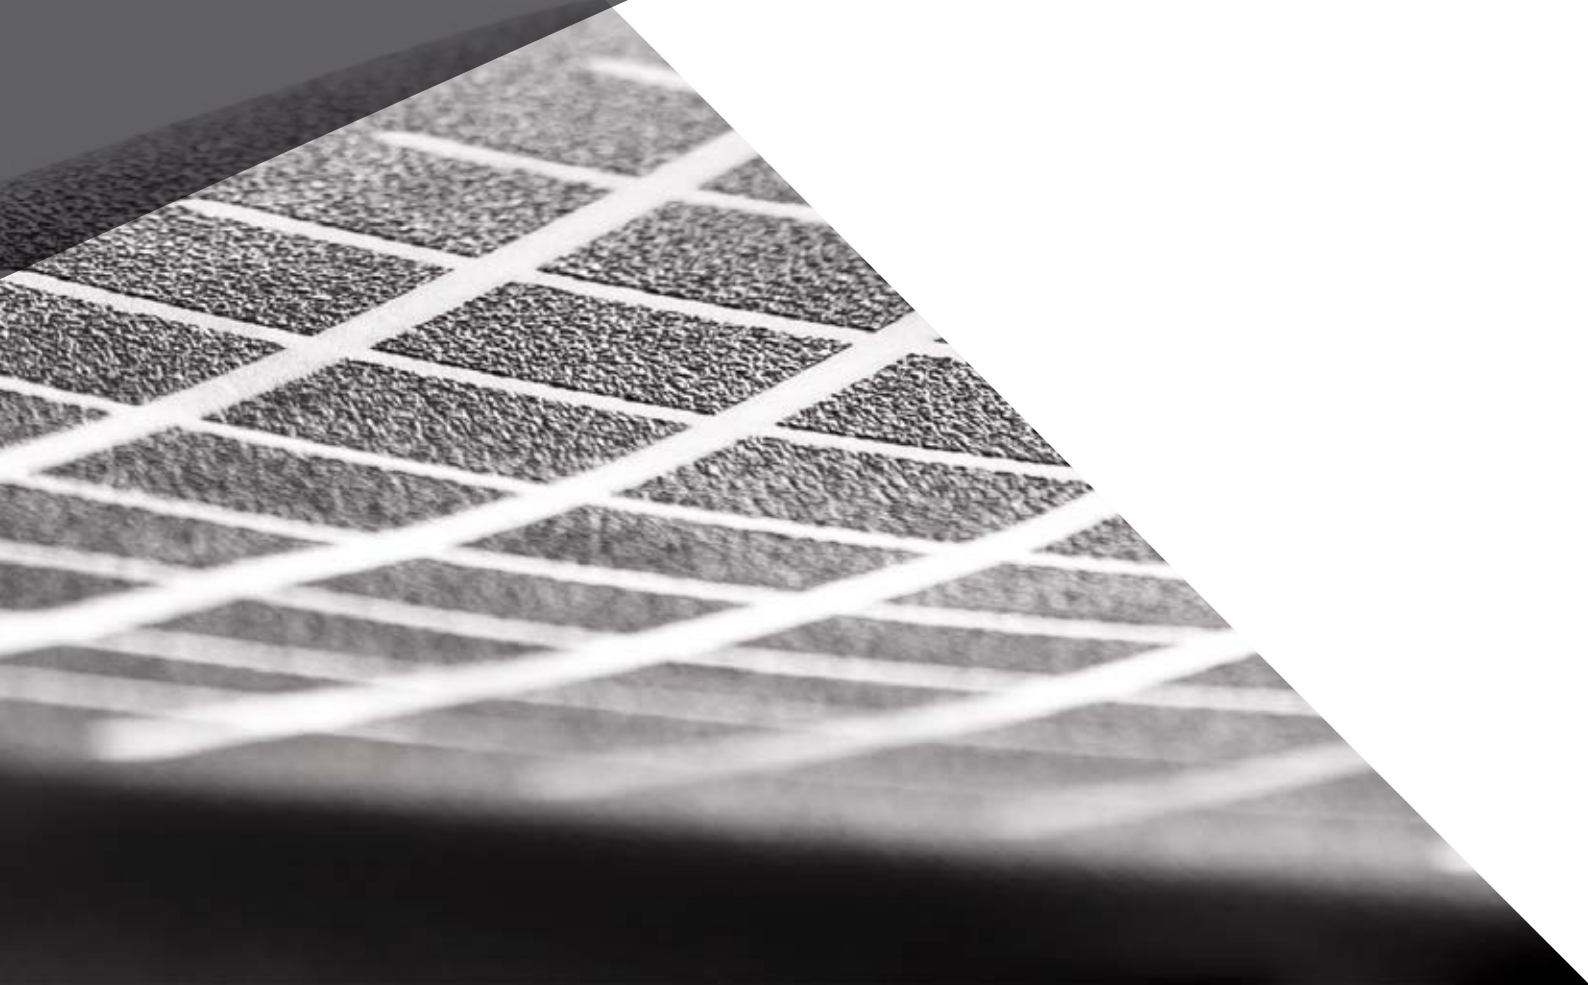

COMPANY PROFILE

Diwar was founded in 1970 not far from Venice as a small factory of plastic moulding for the furniture industry.

Since then, starting from the design and development of components, Diwar has gained sturdy expertise in the field of office, community and contract seating, considering both the chair in its entirety and its positioning in the target market.

The Diwar brand is well established worldwide for its original style and quality of its products. Today, under a strong and skilled managerial team, Diwar updates the classic products and presents new proposals to embark on a new stage of development.

PERMANENT CONTACT

The Memphis workplace chair is extremely robust and practical, ideal for use in offices and factories, checking points, workshops and laboratories. It guarantees a high level of safety, hygiene and ergonomics. Integral polyurethane foam delivers a product that is soft and durable, with a tough, flexible, tear-resistant skin. The strong integral self-skinned surface provides protection against scratch, wear and tear and abrasion.

TECHNICAL NOTES

PERMANENT CONTACT SN1601815, thanks to the lateral knob, allows to easily adjust the backrest inclination according to your favorite position while you are sitting down. Back height adjustment with rear knob.

TECHNICAL DETAILS

- polyurethane integral skin foam seat and back
- back height adjustment with knob
- permanent contact
- gas column with polypropylene cover
- height adjustable chrome plated foot-ring
- five star nylon base with steel collar
- Ø 49 mm polypropylene glides

- *sedile e schienale in poliuretano integrale autopellante*
- *schienale regolabile in altezza con volantino*
- *contatto permanente*
- *colonna a gas con copricolonna in polipropilene*
- *anello poggipiedi cromato regolabile in altezza*
- *base a cinque razze in nylon con anello in acciaio*
- *piedini in polipropilene Ø 49 mm*

MEMPHIS UPHOLSTERED

PERMANENT CONTACT

The Memphis workplace chair is extremely robust and practical, ideal for use in offices and factories, checking points, workshops and laboratories. It guarantees a high level of safety, hygiene and ergonomics. The upholstered version is the ideal solution when a really comfortable chair is needed. In addition to its outstanding ergonomic features, Memphis is above all extremely comfortable. With synthetic leather cover or the latest technological materials available it provides maximum comfort and sturdiness at the same time

TECHNICAL NOTES

PERMANENT CONTACT SN1601815, thanks to the lateral knob, allows to easily adjust the backrest inclination according to your favorite position while you are sitting down. Back height adjustment with rear knob.

TECHNICAL DETAILS

- upholstered seat and back
- polypropylene outer seat and back
- back height adjustment with knob
- permanent contact
- gas column with polypropylene cover
- height adjustable chrome plated foot-ring
- five star nylon base with steel collar
- Ø 49 mm polypropylene glides

MEMPHIS WOOD

PERMANENT CONTACT

The Memphis workplace chair is extremely robust and practical, ideal for use in offices and factories, checking points, workshops and laboratories. It guarantees a high level of safety, hygiene and ergonomics. Seat and back are made of beech plywood. This washable material is particularly well suited to environments that contain aggressive substances. Wood is highly resistant, robust, durable and easy to clean. The transparent varnish highlights the natural veins of the wood.

TECHNICAL NOTES

PETRA

PERMANENT CONTACT

Built to meet the highest international standards this chair scores full marks across the board on ergonomic comfort, performance, price, versatility and durability. The Petra workplace chair is a model of outstanding comfort thanks to its anatomically designed foams. Outer back and under seat are made of durable non-scratch polypropylene, which means the Petra is both easy to clean and hard-wearing. On request the same chair is available with light grey plastics.

ASTREO

Astreo is the practical solution for workplaces where people have to sit as well as stand. The seat surface has a non-slip pattern so you feel completely safe and comfortable when you sit. This hard-wearing stool provides optimum support in industrial and workshop applications. The sturdy five-star base and the solid seat made of integral polyurethane foam guarantee a long lifespan. The pneumatic column is also available with an easy ring control for a practical seat height adjustment.

PAROS

The round front edge of the seat prevents blocked circulation in the thighs. With its extra-large seat of 38x43 cm Paros ensures comfort even in the smallest space. It is solidly built and is extremely tough. Thanks to the metal foot-ring you can rest your feet even when the gas column is completely extended. The five star non-tipping base provides a safe and stationary position with any seat height. On request Paros is available with a polished aluminium five-star base.

MILETO

If you are looking for a budget-priced and basic model, Mileto is a straightforward yet solid option. It is ideal for workplace situations that involve standing up as well as sitting down. The standard nylon base is reinforced with 30% glass fibre and an internal steel collar. Mileto is available with a choice of castors with load-sensitive brakes for hard floors or with abrasion-resistant glides.

SPARTA

For people whose jobs require mobility, standing, sitting and moving around, the Sparta is perfect for its reduced dimensions, making it ideal for sitting for short periods without getting in the way at other times. For all these scenarios, the Sparta stool is the entry-level solution. It is equipped with a highly resistant, robust, durable and easy to clean wooden seat.

As an alternative to the adjustable foot-ring a special aluminium base with fixed foot-ring is available.
